### About Me

Full-Stack Software Developer specializing in e-commerce and modern web applications. Experienced in building Shopify storefronts with Liquid, JavaScript, and JSON, developing responsive front-ends with Sass, Bootstrap, and React, and creating custom WordPress themes with PHP, Laravel, and Sage. Skilled at translating Figma/Adobe XD designs into production-ready code, performing cross-device QA, and troubleshooting with Chrome DevTools. Passionate about delivering clean, maintainable solutions across the stack.

### Experience

#### ○ Web Developer

*Malkin Made | May 2022 – Oct 2025*

- Built custom WordPress themes using PHP, Laravel, and Sage to deliver fast, maintainable sites.
- Designed and styled web applications with Sass, CSS, and Bootstrap 5 for responsive layouts.
- Developed Shopify content and features using Liquid, JavaScript, jQuery, and JSON to support dynamic storefronts.
- Created a reusable Sass utility kit to standardize styling across projects, preventing CSS duplication and improving maintainability.

#### ○ Talent Systems Intern

*Cornerstone OnDemand | Sep 2021 - Nov 2021*

- Performed quality assurance testing on the company's web platform to identify and document issues before release.
- Built and updated frontend features using HTML5, CSS3, Bootstrap 4, and jQuery to improve site functionality and design.
- Converted Figma UI designs into responsive, production-ready web pages.

#### ○ Academic Web Services - Student Assistant

*Grand Canyon Education, Inc. | Jan 2021 - Sep 2021*

- Performed quality assurance on web content to ensure accuracy, consistency, and usability.
- Troubleshoot software issues using critical thinking and problem-solving to resolve errors quickly.
- Worked with Microsoft xRM to manage and update customer relationship data.
