Joshua Williams

Fullstack Developer

Phoenix, AZ • +1-310-654-5664 • d.willjoshua@gmail.com • https://jwill1551.github.io/portfolio-25/

Full-Stack Web Developer experienced in building production ready Shopify, WordPress, and custom web apps. Skilled in responsive front-end development with React, Sass, Liquid, and back-end logic using PHP, Laravel, and Node.js. While knowledgeable at translating designs into production-ready code, performing QA on client sites, and debugging with Chrome Dev Tools. Recent work includes maintaining a church WordPress site, building JavaScript apps for Jigsaw Health, and creating a reusable Sass toolkit to team productivity in web designing.

WORK EXPERIENCE

Full Stack Developer   **May 2022 - Oct 2025**
Malkin Made, Phoenix, AZ

- Built custom WordPress themes using PHP, Laravel, and Sage to deliver fast, maintainable sites.
- Designed and styled web applications with Sass, CSS, and Ginger Grid for responsive design.
- Developed Shopify content and features for a client using Liquid, JavaScript, jQuery, and JSON, which boosted users sessions between 43% - 86%.
- Created a reusable Sass utility kit that prevented CSS duplication by 30% and improved project styling for the team.
- Provided quality assurance and ADA compliance standards to client websites to provide a satisfactory site experience to other users.

Talent Systems Intern   **Sep 2021 - Nov 2021**
Cornerstone OnDemand, Santa Monica, CA

- Performed quality assurance testing on the company's web platform to identify and document issues before release.
- Built and updated front-end features using HTML5, CSS3, Bootstrap 4, and jQuery to improve site functionality and design.
- Converted Figma UI designs into responsive, production-ready web pages.
- Improved site responsiveness to ensure a consistent, user-friendly experience across browsers and devices.

Academic Web Services - Student Assistant   **Jan 2021 - Sep 2021**
Grand Canyon Education, Inc., Phoenix, AZ

- Performed quality assurance on web content to ensure accuracy, consistency, and usability for end users.
- Troubleshot software issues using critical thinking and problem-solving to resolve errors quickly.
- Worked with Microsoft xRM to manage and update customer relationship data.
- Provided client-facing support by identifying technical issues, and assisting with timely resolutions.

EDUCATION

Grand Canyon University, Phoenix, AZ   **2018 - 2022**
Bachelor of Science — Software Development
